

DESCRIPTION

XT601

Prefabricated Commissioning Solution with 60 mm flushing bypass, **equal percentage** PICV, **Filterball**® shut off valve with integrated strainer, drain valve, air vent and additional test point.

The kit is ready to be install and provides with all components required for commissioning and operation of FCU. By-pass avoids reverse flushing across the PICV.

100% factory tested against leakage.

Fully maintainable **PICV** test point for commissioning and system optimization.

Filterball valve with blowout proof stem, triple sealing technology and adjustable packing gland.
