

DESCRIPTION

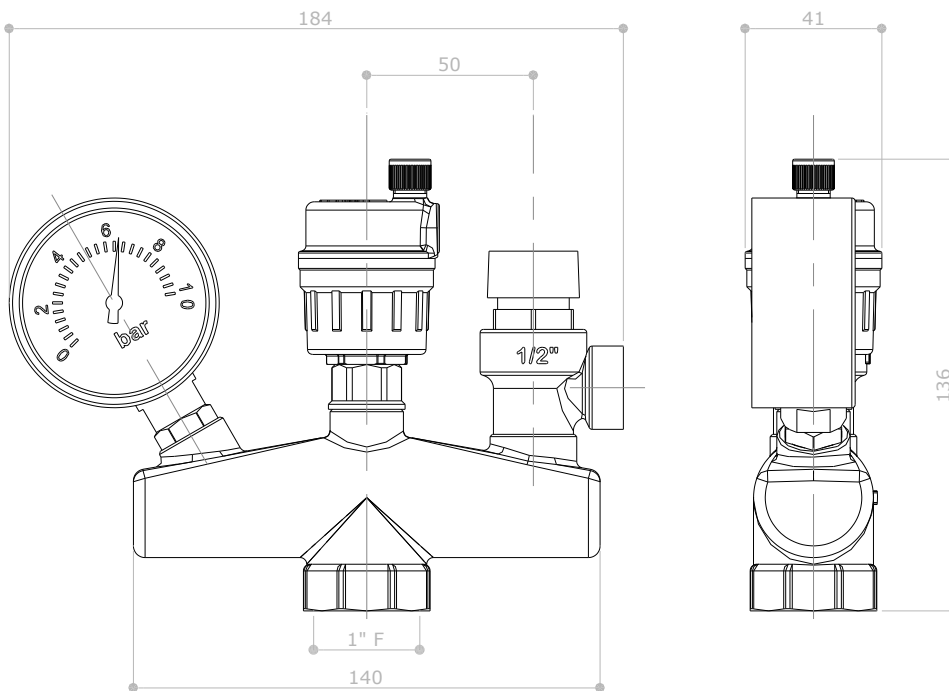

PE135.33.G

Safety group for heating system made with:

- Automatic air vent
- Pressure gauge/manometer
- Safety valve
- Insulation shell

Pressure gauge and automatic air vent with check valve for easy service

DIMENSIONS

MATERIALS AND FEATURES

Body	Brass CW617N - UNI EN 12165
Fluids	water
Maximum working temperature	100°C
Safety valve rate	3 bar
Factory setting	1,5 bar
Max pressure	PN10
Heating systems with maximum inlet pressure of:	10 bar

INSTALLATION AND USE

Safety group comes with all parts unsealed; remove insulating shell and choose orientation depending on the system; use only sealant/tape/hemp designed for brass couplings.

WARNING: Carefully seal the parts avoiding any materials that may obstructs the devices.

WARNING: Installation, maintenance and adjustments must only be carried out by qualified personnel with suitable equipment.
